-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 29 March 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment presented in communication filed March 29, 2004 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 18, 22-24, 26-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Noguchi et al.

Noguchi et al. shows a fuel injection valve having a device 6 configured to give a swirling force, a nozzle 14 and a raised portion as shown in figure 2. It should be noted that the limitation of “for an in-cylinder injection type engine” is considered to be a statement of intended use and since Noguchi et al. has all of the claimed structure, it is deemed that the device can be used for the recited intended use.

With respect to claims 28 and 29, the limitations are deemed to be product by process claims and have been given weight only in as much as since the device shown by Noguchi et al. has the same end result in structure that the limitation has been met.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3752

5. Claims 7, 19-21 and 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al. in view of Mueller (4,467,966).

Noguchi et al. shows all of the claimed limitations but does not show the nozzle being slanted or offset with respect to the longitudinal axis of a fuel injection body. Mueller shows another fuel injector having a nozzle 4 slanted and offset with respect to the longitudinal axis. It would have been obvious to one of ordinary skill in the art to have made the nozzle of Nogushi et al. offset and slanted so as be able to change the characteristics and spray pattern of the fuel injection cycle.

***Allowable Subject Matter***

6. Claims 8, 31 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 1 and 9 are allowed over the prior art of record.

***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanasawa et al., Okamoto et al., Daly et al., and Kawamura et al. all show devices in the general state of the art of the invention.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 3752

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
